YOUR CRYPTOCURRENCY JOURNEY BEGIND HERE

ABOUT US

Building trust, and knowing more about us.

Who Are We?

Evental has many years of experience in trading, market analysis, software, and cryptocurrencies artificial intelligence technologies development.

Our team of engineers, designers, marketers, and analysts are dedicated every day to offering you high-tech products and making your life better.

The mission is simple: "give our clients financial freedom".

We believe in transparency and accountability and do not hide who we are and how we do business. You are at the center of every decision we make. You are our reason to be in business and we will never lose that focus

What Is Cryptocurrency?

A cryptocurrency is a digital or virtual currency secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. Most cryptocurrencies exist on decentralized networks using blockchain technology—a distributed ledger enforced by a disparate network of computers.

How to Buy Cryptocurrency

If you want to use cryptocurrency to buy products and services, you will need to visit a Cryptocurrency exchange. These are businesses that allow you to buy or sell cryptocurrencies from other users at the current market price.

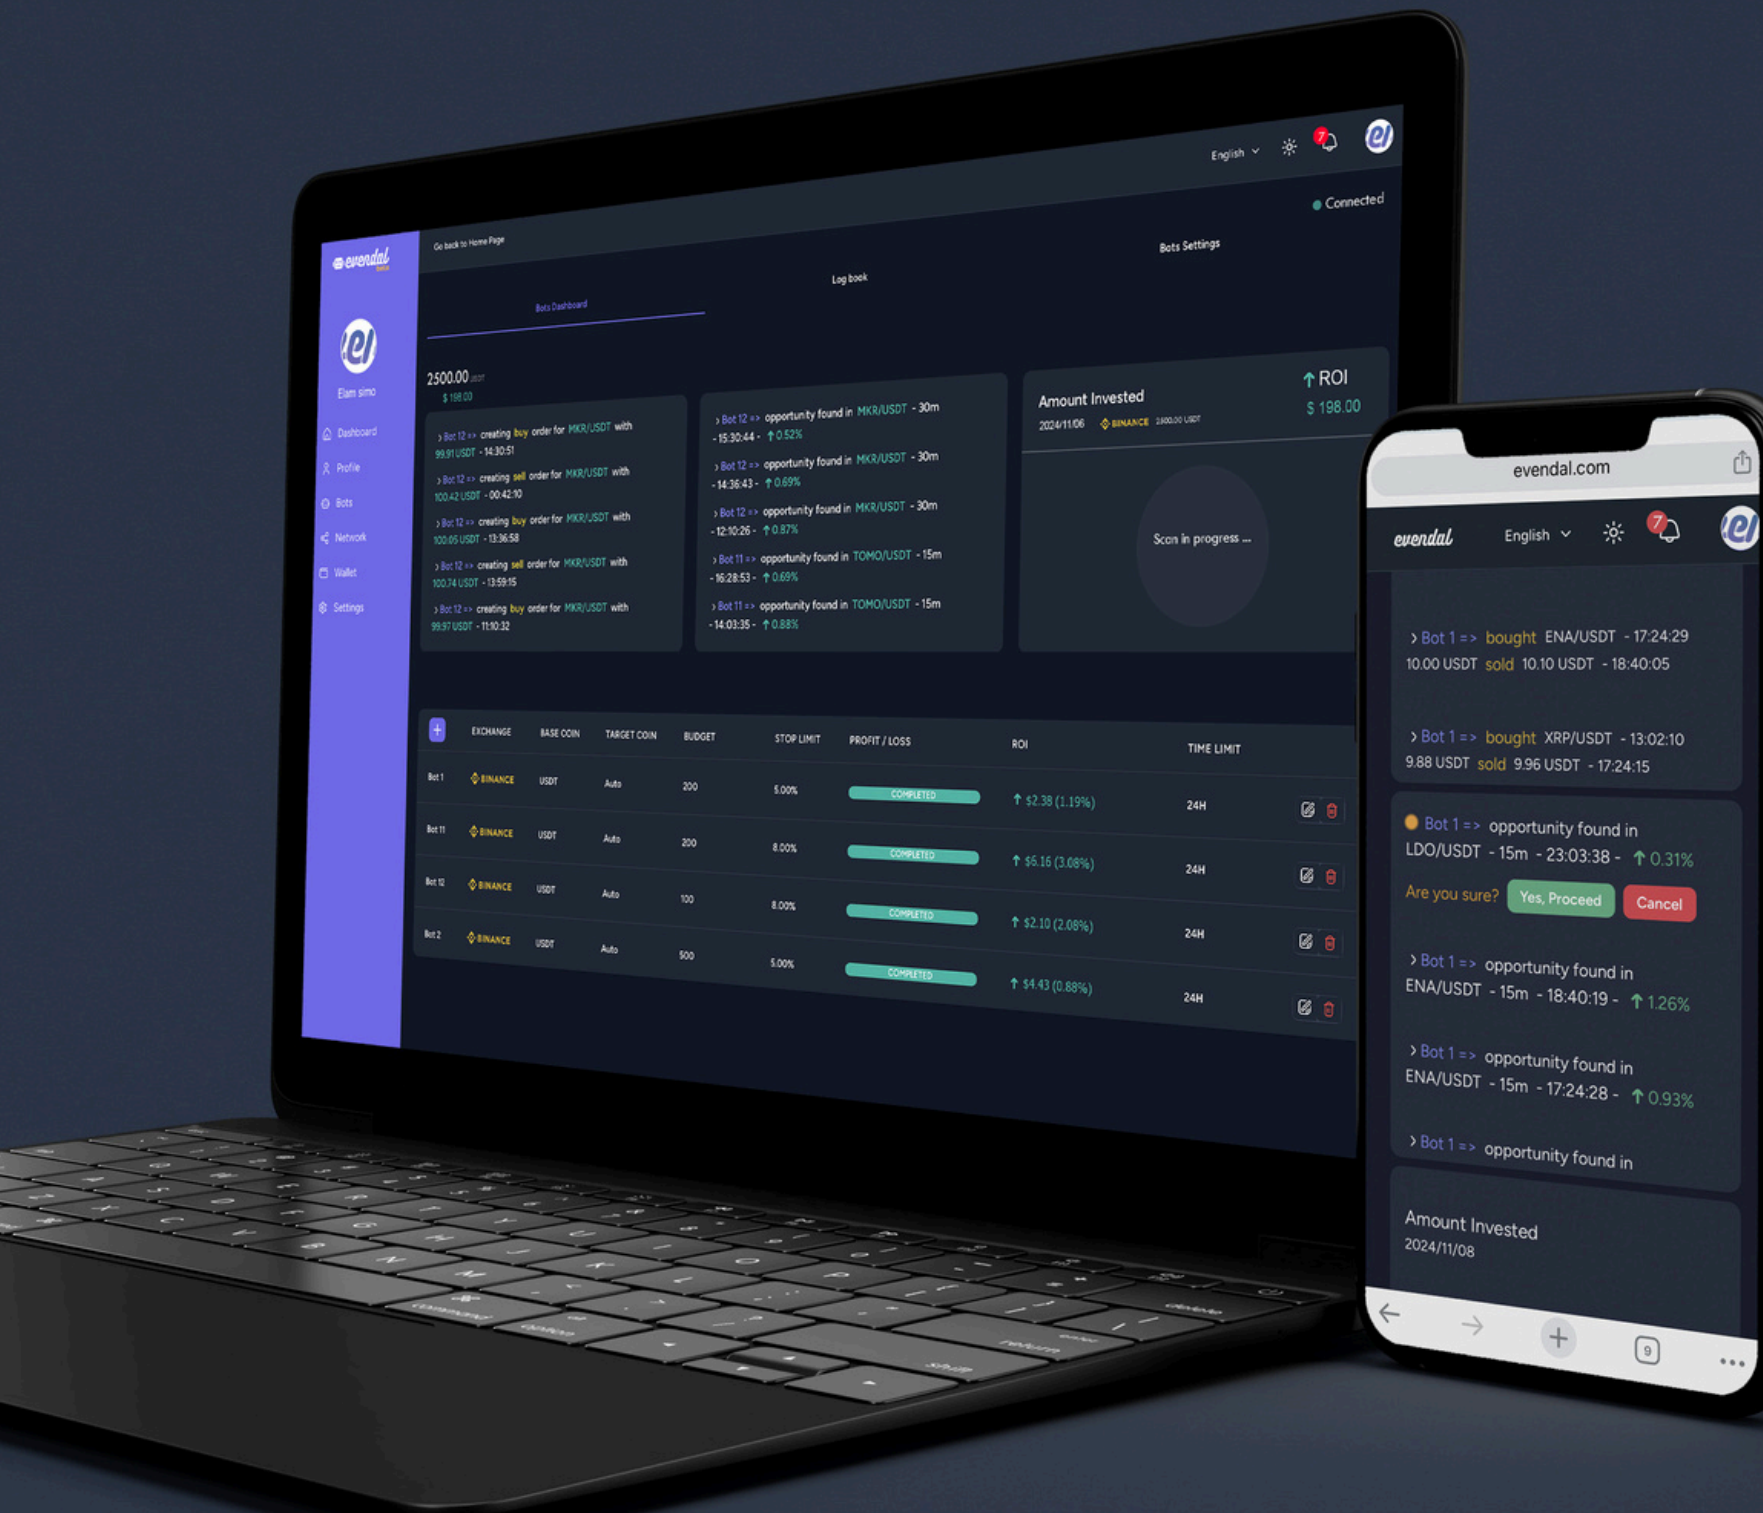

Our Product

AI TRADING BOT

Trading bot is a software application that automates the process of executing trades in the financial markets. It uses predefined algorithms and rules to analyze market data, identify trading opportunities, and execute trades on behalf of the user. This automated approach to trading offers several advantages, including speed, efficiency, and the ability to trade across multiple markets simultaneously.

The rise of trading bots can be attributed to advancements in technology, particularly in the fields of artificial intelligence and machine learning. These technologies have enabled the development of sophisticated algorithms that can quickly analyze vast amounts of data and make trading decisions in real-time.

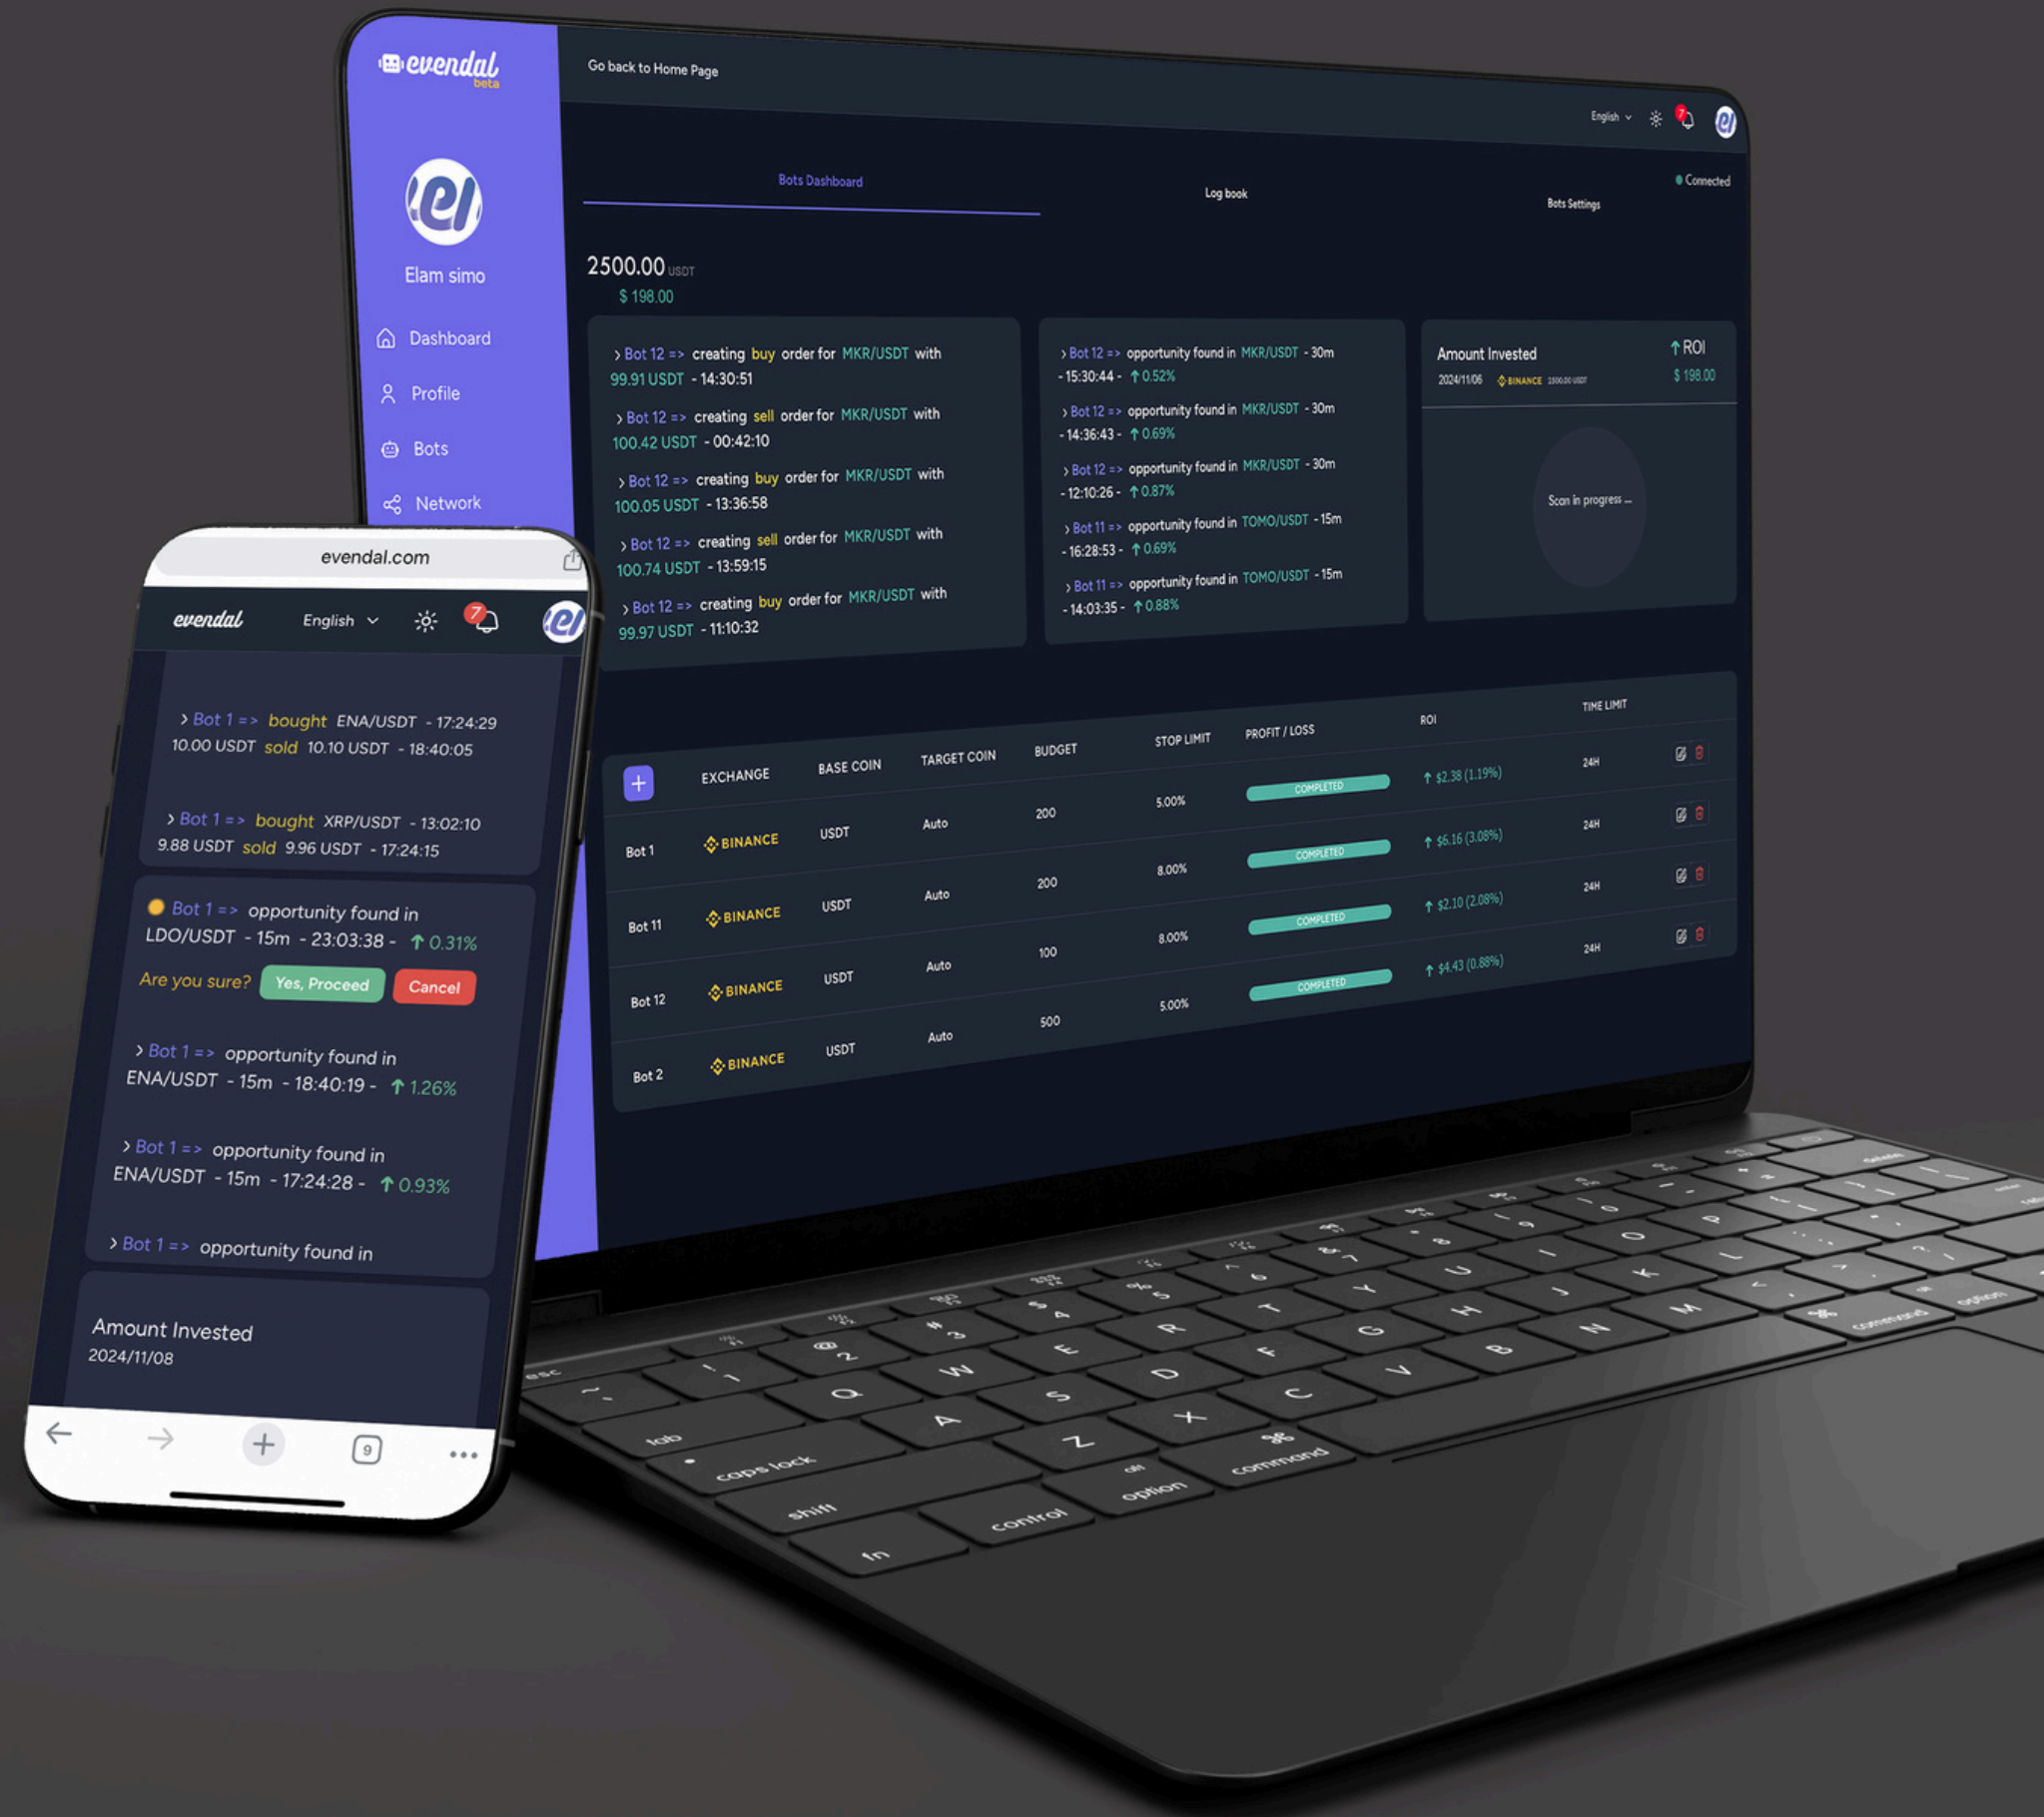

BY EVENDAL

WHY USE A CRYPTO TRADING BOT?

One of the big upsides of the crypto market is that, unlike traditional financial markets, it's borderless and constant. But this can also mean while you're peacefully sleeping or working, a lot can change in the market, and by the time you've had a chance to check your portfolio and the market, you've missed out on buy or sell opportunities.

But not with crypto trading bots. These clever pieces of code help you automate your investment whatever it is making sure you react quickly to ever-changing market conditions like Bear and Bull runs.

ADVANTAGES OF USING TRADING BOT

A

Automation and Efficiency

Trading bots automate the trading process, eliminating the need for manual execution of trades. This saves time and ensures that trades are executed promptly and efficiently, even in fast-moving markets.

S

Speed and Accuracy

Trading bots can analyze vast amounts of market data and make trading decisions in a matter of milliseconds. This allows them to capitalize on price movements and execute trades at optimal prices, potentially leading to increased profitability.

T

24/7 Trading

Unlike human traders who have limits on their availability, trading bots can monitor the markets and execute trades 24 hours a day, seven days a week.

E

Elimination of Emotional Bias

Emotions can often cloud judgment and lead to irrational trading decisions. Trading bots, being free from emotions, strictly adhere to predefined rules and algorithms, reducing the impact of emotional biases on trading strategies.

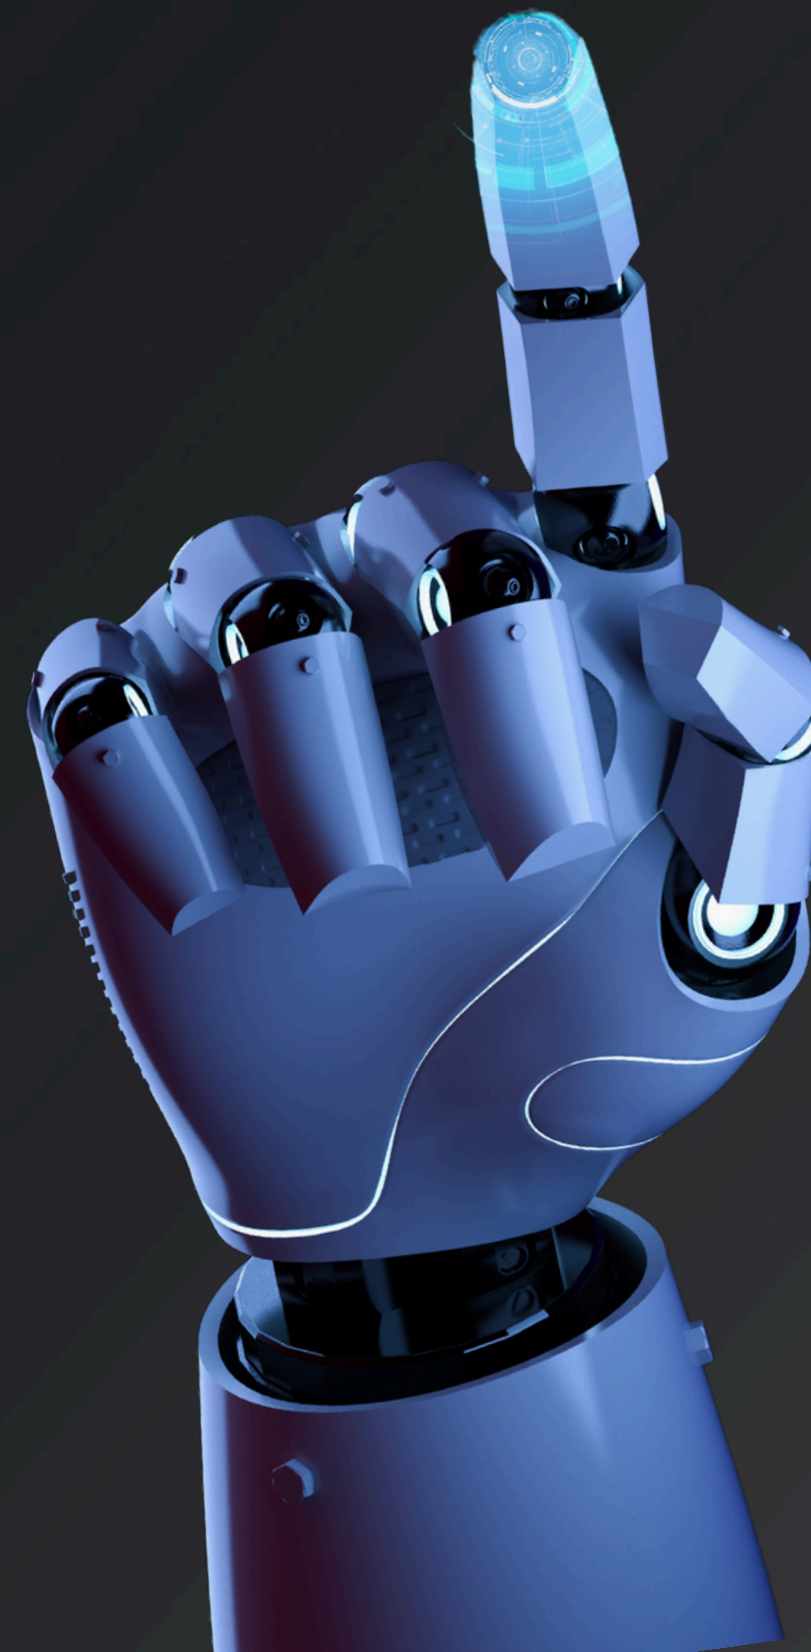

SET UP AND USE A TRADING BOT

EASY TO USE

Connect your trading bot to the exchange where you want to execute trades

Follow the platform's instructions to establish the connection by entering the necessary API keys provided by the exchange.

All the trades execute in your exchange account

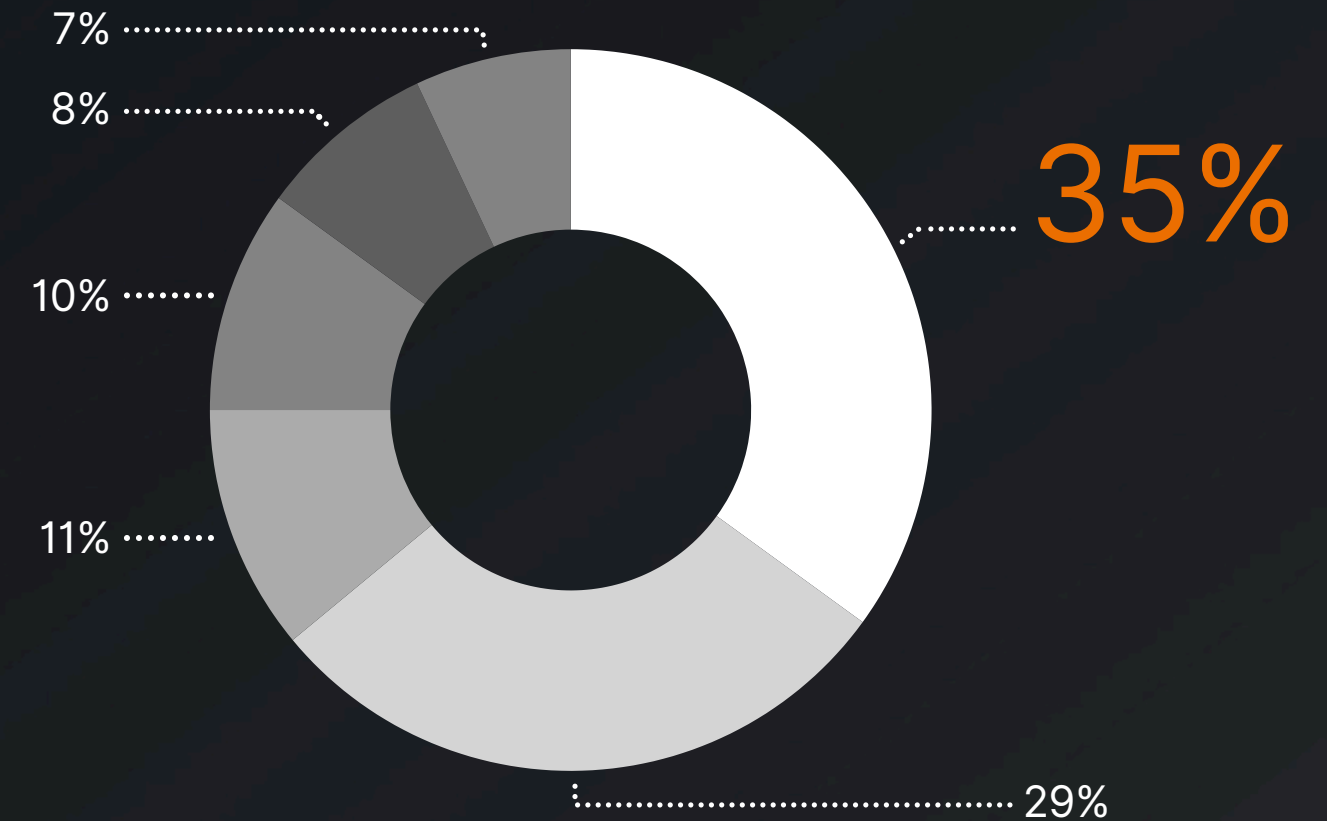

ROI UP
TO
35%

RETURN ON INVESTMENT

The "average" profitability percentage for a crypto trading bot is not a fixed number and can vary greatly depending on the bot's strategy, and market conditions.

Our advanced trading bot with sophisticated strategies could potentially achieve higher returns up to **35%/Month** in the good situations of the market
